This position will be building the QA department from the ground up, including creating and implementing QA processes. The QAE is expected to have experience with the full software life cycle from the QA perspective. The QAE is a curious, motivated self-starter with deep technical expertise.

Individual responsibilities will include, but not be limited to, the following:

- Create and implement QA standards to be enforced across multiple products
- Participate in requirements validation, high level design and code reviews
- Create and maintain test plans and test strategy
- Thoroughly test the product via manual and automated means
- Maintain automated regression tests
- Identify and document software defects and collaborate with developers to verify fixes
- Review and contribute to customer facing documentation

Qualifications will include:

- Strong team attitude, excellent oral and written communication skills
- Testing of public facing APIs/ HTTP/ REST/ JSON
- Creating and modifying Automated Test scripts
- Tools in the Software Development Life Cycle including: source control, build systems, issue tracking, and requirements management
- Experience creating QA Processes
- Experience with CI/CD concepts/tools (i.e. Jenkins, Docker, etc.)
- Agile/SCRUM experience
- Experience with Selenium WebDriver & JavaScript for front-end testing
- Evaluate or recommend other software for testing

Why Chose ARGUS? ARGUS is an equal opportunity employer. Full time benefits will include; 401K Match, Medical/Dental/Vision Insurance, Paid Vacation and Holidays, Flexible Schedules, Competitive Salary with casual atmosphere.
