

ARGUS International, Inc. is Growing Software Engineer Position Available

ARGUS International, Inc.: Founded in 1995, ARGUS is the worldwide leader in specialized aviation services that allow organizations around the globe to improve their operational and business decision making. Our mission is to exceptionally deliver relevant and valuable information solutions to the Business Aviation, Air Carrier, Rotary Wing, UAS, and the overall Aerospace marketplace.

ARGUS is currently seeking a Software Engineer to join our team. This position is 100% Remote. As a Software Engineer at ARGUS, you will be part of a multi-discipline engineering team responsible for the development and maintenance of Argus SaaS products. Candidates should possess in-depth knowledge of a broad range of technologies, engineering best-practices, and a desire to learn and apply new technologies

Individual responsibilities will include, but not be limited to, the following:

- Develop and enhance existing and new applications to improve performance and meet client needs
- Conduct code reviews
- Collaborate closely with all application development team members
- Executes test plans and documents system enhancements
- From time to time provide after-hours application and infrastructure support

Minimum requirements:

- 4+ years' experience in software development, preferably in web applications
- 4+ years of experience building scalable web applications using .NET, C#
- 4+ years of experience using relational and non-relational databases
- Experience with front-end frameworks such as React and Angular
- Experience working on a team using agile development methodology
- Experience building windows services, web services and REST APIs
- Experience developing SaaS products
- Experience implementing modern DevOps practices, CI/CD, and version control
- Solid understanding of software best practices, unit and integration testing, and test automation
- Strong collaboration skills and the ability to work across disciplines and geographies
- A bachelor's or advanced degree in engineering, computer science, or a related field
- Excellent communication (verbal and written) and documentation skills is a must

Nice to Have:

- Experience with Microsoft Azure and Azure services
- Experience with Angular
- Experience developing PWAs (progressive web apps) in place of native mobile apps
- Experience working on a customer facing B2B SaaS product
- Aviation industry knowledge

A member of the SGS Group
